The Graph Foundation @GraphFoundation · 27 Sep 2018

Nasty move by Oracle but expected. We advise you use OpenJDK when running OpenNeo4j distributions from us. If you're using our docker images they are running OpenJDK already and our distributions always use an open source license. #ongdb #neo4j

Stephen Colebourne @jodastephen

[blog] Do not fall into Oracle's Java 11 trap. Use an OpenJDK build, not Oracle JDK: [blog.joda.org/2018/09/do-not-](https://blog.joda.org/2018/09/do-not-)

On another note - Neo has some major competition from TigerGraph which is impressive from what I have seen so far!

1

**The Graph Foundation** @GraphFoundation · 13 Oct 2018

The @neo4j community needs to prevent this from happening to us. Fact is that neo4j does not become the most popular graph without GPL/AGPL #OSS license. #StopCommonsClause #Neo4j use #ONgDB

**OpenSourceInitiative** @OpenSourceOrg

"[@RedisLabs is] now selling licenses of their software which includes #opensource contributions...I bet they knew, many people wouldn't have contributed if they had this #CommonClause from the beginning." - @vruiext, Redis contributor

**John Mark Suhy** @jmsuhy · Feb 23

Replying to @chpanto @akchux @neo4j

If you ever want to use causal clustering while staying 100% open source, you can do so with #ONgDB  
(Neo4j core + enterprise features they removed when they closed Neo4j Enterprise edition at 3.5).  
Just ensure you use the same version number as your current Neo4j version.

**John Mark Suhy** @jmsuhy · 26 Oct 2018

Replying to @Htbaa @graph\_stack

#ONgDB is a straight fork. There are no additional features, it does add back the code that Neo tried to remove to make into a paid feature.

Get building your next app on [#Neo4j](#)/[#ONgDB](#) 3.4 for as low \$7/mo. Start small and scale as you grow with on-demand cloud pricing. We mirror [#AWS](#) scalability and pricing to give you the best rates with availability in 15 Regions including [#GovCloud](#).

1

**John Mark Suhy** @jmsuhy · 25 Oct 2018

Replying to [@codek1](#)

Just use Neo4j Enterprise under it's open source license, or the [#ONgDB](#) enterprise fork. I would bet they are going to go the closed source route starting at 3.5.

Replying to @lewiw @neo4j

Neo4j Enterprise up to 3.4 (They removed enterprise code at 3.5) is 100% free and open source. After 3.4 - drop in **#ONgDB**. [graphfoundation.org/ongdb/](https://graphfoundation.org/ongdb/) - or checkout **#GraphGrid** if you need support , which is a big chunk of what you are paying for in commercial subscriptions.
